

Indiana's telephone privacy law is working great for me and I do not want it to be changed. I pay my own phone bill so I consider my phone to be private. I don't feel that I should ever get a phone call that does not directly apply to my own personal matters. If I do want something from any company, I will call them myself! I would also like to extend a very heart-felt thank you to the FCC for work that they have done for me on this issue.
